

VM-SERIES

Mobile MPI Power Source for Prod and CableWrap Method:

The VM-Series magnetic power source ranging from 4000 amps up to 20000 amps.

Model Type: VM-4000

Technical Specifications

- Input supply 415V, 50Hz, 3 Phase.
- Maximum output in AC/HWDC. (5Mtrs Cable shot) – 1Phase Output
- Remote Pendant with 10Mtrs Cable
- This reduces the overheating of the transformers and increases performance of the power pack.
- Fabricated body mounted on revolving castor wheels for easy mobilization.
- Provision for quick changing over of cables from AC to DC.
- Fabricated body mounted on revolving castor wheels.
- Safety Interlocking limit switch for AC/DC.
- 230 V auxiliary supply.
- Provision for Remote Control Assembly.
- Infinitely variable Thyristorized magnetizing current control.
- Automatic, push button AC Decay Demagnetization.
- Rugged handle to push the equipment.
- Provision to hang the cables on the equipment.
- Easy to maintain side panels.
